A. Introduction

Scope and Aim	1
Prologue : Article from 1993	5

B. Cooling of Europe

Arctic Europe - winter of 1939/40 (2_11)	7
West Wind lost - Europe cut off (2_12)	23
War at sea 1939 - Facts and events (2_13)	37
Sea Mines September - December 1939 (2_14)	45
Bombs and depth charges at sea (2_15)	59
Cooling of North Sea - 1939 (2_16)	69
Baltic Sea paved way for extreme winter (2_17)	87
Cyclones and shells - War at sea events (2_21)	97
Resultant Rain due to War - 1939 (2_31)	107
USA winter weather 1939/40 caused by war 2_32)	117
War in China - 1939 (2_33)	123
Russia invades Finland, December 1939 (2_41)	127
Turkey Earth Quake - 27 December 1939 (2_51)	141
Mediterranean - Strange weather - winter 1939/40 (2_52)	149

C. Three European winters: 1939 – 42

Occupation of Norway - Return of Ice Age (3_11)	153
Naval activities in Baltic Sea 1941 (3_21)	173
Winter weather - Cold axis 1941/42 (3_22)	181
Stockholm's arctic winter of 1942 (3_23)	193
Three year ice package, 1939-1942 (3_31)	199

D. Global sea war and climate changes

Oceans in times of war: 1942 to 1945 (4_11)	211
Ocean System affected (4_12)	225
Extreme winter of 1946/47 in Europe (4_21)	245

E. Severe Warming 1918

Europe Weather-Influence by WWI (5_11)	251
Spitsbergen heats up - Big Warming 1918 (5_12)	263
WWI warms up climate at Spitsbergen? (5_13)	275
Sea Mines Warfare 1914 - 1918 (5_14)	285
Warming of Europe, Greening of Greenland (5_15)	291

F. Climate changes twice

Two wars at sea - Two climate shifts (6_11)	303
Epilogue, Article from 1994	311

G. References

313

A. Introduction

Scope and Aim	1
Prologue, Article from 1993: “Warming Up – Sciene or Climate”	5

B. Cooling of Europe

Arctic Europe - winter of 1939/40 (2_11)	7
Climate Surprise	7
Top Secret - The Weather	7
Introduction	8
Severity of the winter 1939/40	9
Great Britain	9
The Netherlands	10
Norway	11
Sweden	11
Denmark	11
Baltic Countries	12
Germany	12
Hungary	13
Switzerland	13
Italy	13
Turkey	13
United States	14
Chronicle	14
January 1940	16
February 1940	20
Conclusion	22
West Wind lost - Europe cut off (2_12)	23
Introduction	23
Weather from normal to arctic	23
Cold December 1938 and was El Niño involved?	23
Why back to the ice age in winter 1939/40?	24
Meterological developments in autumn 1939 in focus	24
Start of Winter analyzed by Neue Zürcher Zeitung	25

What role did El Niño play?	25
Effective start of the winter of 1939/40 elaborated	27
Weather during 1939 - Four country assessment	28
The weather on the British Isles during 1939	28
The weather in Germany during 1939	28
The weather in Sweden during 1939	29
The weather in Switzerland during 1939	29
The missing west-wind	30
The flow of Atlantic air	30
Deviation from average? - September 1939 - First signs?	31
The analyst wonders - October 1939	32
November 1939 - Average not returned	33
The drift is gone - December 1939 - The ice age returns	34
Changed wind direction	35
Comment & Conclusion	36
War at sea 1939 - Facts and events (2_13)	37
Introduction	37
The theme	37
Similarities	37
The presentation	38
Some general data	39
Naval Fleets	39
Depth Charges	39
Ships; Available and lost	40
British naval vessels lost	40
Some warfare aspects	40
British Naval “Cavalry” Riding the Sea	40
Hunting German vessels	42
The ‘diamond pattern’	42
Arming the merchantmen	42
Minesweeping	43
Convoy	43
Aerial bombing and mining	44
Summary	44
Sea Mines September - December 1939 (2_14)	45
Introduction	45
Sea mines and weather modification	45
Using sea mines as a weapon	45
Mining the North Sea	46
England’s east coast	46

Helgoland Bight (Deutsche Bucht)	47
Mining along the West coast of Britain, 1939	48
Mining the Baltic Sea, 1939	48
Minesweeping and Countermeasures	49
What did the Mine Warfare do to the Weather?	50
Some Mining Events during late 1939	52
Summary	57
Bombs and depth charges at sea (2_15)	59
The Theme	59
Means of warfare increased	59
Bombing at Sea	60
Depth Charging of U-boats	61
How many?	61
Care to be taken	61
A seaman's story?	62
Attacking pattern	62
Some Bombing Events in 1939	63
Summary	68
Cooling of North Sea - 1939 (2_16)	69
Introduction	69
Coming as a surprise!	69
The theme	70
North Sea's climatic features	70
A principal contributor	70
Seasonal heat storage	72
Autumn season and the war	71
Further elaboration	72
Temperature Structure in autumn	73
Water temperatures at Helgoland station in autumn 1939	76
Early, severe and long lasting icing conditions	77
Changed factors	78
Interchange air - water	78
Heat matters	80
Meteorological 'West Wall' - Wind Drift blocked	81
More Evaporation - more wind, rain, cooling	81
Events: Serious icing in the North Sea, winter of 1939/40	83

Baltic Sea paved way for extreme winter (2_17)	87
Preamble & Introduction	87
Baltic Sea – Physical features and winter climate	88
German navy starts war	89
General developments until the end of the year 1939	90
Soviet-Finnish War - December 1939	91
Strange coincidence	91
Ice condition in the winter of 1939/40	91
Subsequent winters and summary	92
List of events from September 1939 - March 1940	93
Ice conditions assessment	96
Cyclones and shells - War at sea events (2_21)	97
Introduction	97
The Theme	97
Formation of Cyclones	97
Chain of causes - the butterfly effect	97
Sea-air interaction	98
Investigation period	99
War activities and weather events (Five examples)	99
Conclusion	106
Resultant Rain due to War - 1939 (2_31)	107
Aim of this paper	107
Limitations of this paper	108
Basic Factors	110
Poland without rain in September 1939	111
October 1939 - Raining ‘Cats and Dogs’	113
November 1939 - Rain Spares France - At least for now	114
Saxony and Switzerland - December 1939	115
Russian-Finnish battles in December	115
Summary	116
USA winter weather 1939/40 caused by war (2_32)	117
The United States pushed into the cold	117
USA deprived of rain - October to December 1939	118
Natural variation?	120
Summary	121

War in China - 1939 (2_33)	123
Russians meet Japanese for duel	123
Effect of record cold January on War in China	124
A few Events in China in late 1939	125
Summary	126
Russia invades Finland, December 1939 (2_41)	127
Weather and War in the Arctic Circle	127
Background of the Conflict	129
Some early events to be mentioned	130
Temperatures in North Sweden - December 1939	131
Weather data from Finland in December 1939	131
Naval activities in the Gulf of Bothnia	132
Naval activities in the Barents Sea	133
The Russian Offensive - A Chronicle	133
Thursday, 30 November 1939	133
Friday, 1 December 1939	134
Friday, 8 December - Second week	135
Friday, 15 December - Third week	135
Friday, 22 December 1939 - Forth week	136
Friday, 29 December 1939 - Fifth week	138
Early 1940 - January and February	138
Ending of Winter War 1939/40	140
Turkey Earth Quake - 27 December 1939 (2_51)	141
The Quake	141
Weather conditions before the earthquake	141
What happened after the earthquake?	143
Recent research	144
Summary & Chronicle	145
Mediterranean - Strange weather - winter 1939/40 (2_52)	149
Overview	149
Earth quake in Turkey and subsequent Black Sea cyclone	150
Atlantic diverts cyclones to the Mediterranean	151

C. Three European winters: 1939 – 1942

Occupation of Norway - Return of Ice Age (3_11) 153

Introduction	153
Choosing Norway	153
The War at Sea during 1940 and the “Weseruebung”	155
Conditions in general	155
“Weseruebung”	156
Meteorological Situation - Northern Europe - 1940	157
General Weather Conditions:	157
Winter 1940/41	158
Sweden, Denmark and Germany - winter weather 1940/41	159
December 1940	159
German Daily Weather Charts	160
December 1940	160
January 1941	161
Norway - The Making of Record Temperatures	163
Monthly mean air temperature in Norway in January 1941	163
Signals from sea water temperature data – difficult to assess	164
Lowest temperatures in south Norway - January 1941	164
Norwegian records concerning seawater temperatures	165
Water temperature in the Skagerrak	165
Norwegian Directorate of Fisheries data series	166
Sea Ice Coverage	168
Summary on Norwegian water temperatures	170
Conclusion	171

Naval activities in the Baltic Sea 1941 (3_21) 173

A few words in advance on icing in the Baltic Sea	173
‘Barbarossa’	174
Participants in the naval action in the Baltic Sea	174
Mining of the Baltic	175
Other naval activities	177
Losses in the Baltic	178
The Southern Baltic Sea	178
Baltic Sea ice winter 1941/42	179
Summary	180

Winter weather - Cold axis 1941/42 (3_22) 181

Introduction	181
--------------	-----

The Theme	181
The field experiment	181
The weather during 1941	182
Germany	182
Sweden	182
Britain	184
Autumn weather and the war in Russia	184
Winter months of 1941/42	186
Germany	186
Netherlands	187
Sweden	187
Denmark	188
Finland	189
Britain	189
Cold Air Pool January 1942	190
Summary & further subject chapter	191
Stockholm's arctic winter of 1942 (3_23)	193
Choosing Stockholm	193
Sweden already out of tune in 1941	194
The Swedish winter 1941/42 in detail	194
Amazement of a scientific witness	194
January 1942	195
February 1942	196
March 1942	196
Considerations	197
Stockholm's ice winter 1941/42	197
Conclusion	198
Three year ice package, 1939-1942 (3_31)	199
From highest warmth to lowest cold	199
Two 'war at sea' phases during WWII	199
Climatic relevance of the two phases	200
War and the seasons	201
Three war summers: 1939-1942	202
Centres of record winters	202
Scientists' observations of war winters 1939-1942	202
Drummond 1943 (Kew Observatory); Lewis 1943 (British Isles)	203
Liljequist 1943 - Stockholm	205
Groissmayer	204
Hesselberg and Birkeland 1956 - Norway	205
Rodewald - Severe Winters	206

Three ice winters in the Baltic Sea	207
Europe, the unique receiver of three arctic winters	209
Europe - the sole generator of arctic winters	208
British Isles 'three years winter package' 1915-1918	209
Summary	210

D. Global sea war and climate changes

Oceans in times of war: 1942 to 1945 (4_11) 211

Merging together what do not belong?	211
War at sea in the Atlantic, 1939-41	212
Time period and sea area	212
U-boats in the Atlantic	213
War at sea in the Pacific	215
War in the Atlantic, 1942 –1945; Presentation of the theme	217
Aerial warfare over the Atlantic	217
U-boats off Florida and Cape Hatteras - 1942	218
U-boats	219
Atlantic Convoys	219
Tanker	220
Ammunition ships	220
Depth Charges	221
Gunners	222
Arctic Convoys	222
Atlantic Sea Mines	224
Summary	224

Ocean System affected (4_12) 225

Oceans as a theme	225
World War One (WWI) and the Northern North Atlantic	225
WWII and the Ocean System in the Northern Hemisphere	226
Some Features of the North Atlantic	228
The Atlantic since 1942	228
Two water basins and two water bodies	229
Middle and Northern North Atlantic	230
Arctic	232
Winter icing in the Northern Atlantic 1939-45	233
North Atlantic sea surface temperature observation	235
Some features of the North Pacific	238

The Pacific's Northern Front - Aleutian Islands	240
Observation of Sea surface, 1939 plus - in the Pacific	241
Different impacts of WWI and WWII	241
'Warming' or 'Cooling' - is it an oceanic question?	242
Few Questions. Short Answers	243
Summary	243
Extreme winter of 1946/47 in Europe (4_21)	245
Introduction	245
General features of the 'arctic peace winters'	245
Britain takes record	246
Winter of 1928/29	247
Winter of 1946/47	248
Difference between war and peace winters	249
Can the winters of 1928/29 and 1946/47 prove something?	249
Summary	250
E. Severe Warming 1918	
Europe Weather-Influence by WWI (5_11)	251
Introduction	251
Did Shelling Bring Rain?	252
Air Temperatures	253
Sea Surface Temperature	259
English Channel	259
Irish Sea	259
The Baltic Sea During the War Years	260
Ice conditions in the North- and the Baltic Sea	260
Ice conditions at Spitsbergen	261
Conclusion	262
Spitsbergen heats up - Big Warming 1918 (5_12)	263
Warming process started around 1880	263
Rise in temperatures	263
Focus on Spitsbergen	264
Spitsbergen Temperatures 1912 - 1926	266
Cause for the rise in temperature	268
Sub polar North Atlantic	271
Previous research and analysis	272

Summary	273
WWI warms up climate at Spitsbergen? (5_13)	275
A big warming started 1918	275
Structure of the paper	276
The war period 1914 - 1916	277
Weather protects impertinent attacker	277
Battle of Jutland - May 31, 1916	278
Tanker 'Conch' torpedoed - December 1916	279
Naval warfare 1914-1916	279
Naval Warfare 1917-1918	281
General impact	281
Depth Charges - What it meant to attack a U-boat?	281
Operating in a sensible area - Around the Shetlands	282
Barents Sea and Baltic Sea	283
Summary	284
Sea Mines Warfare 1914 - 1918 (5_14)	285
How to describe sea mines in action?	285
Mines laid during the war	285
Mine sweeping	286
Field Report - Example 1	286
Field Report - Example 2	287
Operation continued	287
Drifting mines	287
Losses on account of Mines	288
Northern Mine Barrage	288
Mine warfare and the Norwegian Coastal Current	290
Summary	290
Warming of Europe, Greening of Greenland (5_15)	291
Climate Change - War at Sea impact 1918 to 1939	291
The Theme - chain of proof	291
Impact on different sea areas	292
Three major climatic events after WWI	293
General Statements, Facts and Remarks	295
Spitsbergen	295
Greenland Sea / Greenland	296
Barents Sea	297
Norwegian Sea	298

Atlantic - South of Iceland - West of England	299
Slevogsbank (South Iceland), sea water temperatures, 1895 -1939	300

F. Climate Changes twice

Two wars at sea - Two climate shifts (6_11) 303

The basic assumption	303
Overview of climatic changes since 1880	304
End of the Little Ice Age -1880	304
Warming of Europe –1918 to1939	304
Four decades of cooling - 1940 and after	304
Global Warming - 1980 and after	305
Special feature of the war periods 1939/42 and 1942/45	306
Special features of the three war winters 1939-42	306
Speciality of the war period 1942/45	306
Climatic relevance of major temperature periods	307
What conclusion can be drawn?	309
 Epilogue, Article from 1994: “Back to Water – Cheers”	 311
